COMPANY OVERVIEW

Technology Built Around Business Outcomes

Excelogy Integrated is an IT consultancy and Managed Service Provider (MSP) helping organisations design, implement, secure and manage modern technology environments. We combine strategic consultancy with hands-on engineering, implementation, ongoing managed services and professional technology training.

SECURE

Protect systems, identities, applications, networks and information.

MODERNISE

Move from fragmented or ageing technology towards modern, integrated platforms.

MANAGE

Provide ongoing management, monitoring, maintenance and technical support.

BUILD

Engineer software, integrations, platforms and data solutions.

ENABLE

Develop practical digital capability through focused professional training.

OPTIMISE

Continuously improve performance, resilience and operational effectiveness.

WHO WE ARE

Your Technology Partner

Excelogy Integrated brings together consultancy, engineering, project delivery, managed services and professional training within a single technology practice. This enables us to support organisations from strategy and architecture through implementation, operational support, skills development and continuous improvement.

DISCOVER

Understand priorities, risks, skills requirements and operating constraints.

ARCHITECT

Define target architecture, controls and a practical delivery roadmap.

DELIVER

Implement in controlled stages with testing, documentation and governance.

SUPPORT

Manage, monitor and optimise the environment.

ENABLE

Build practical capability through targeted technology training.

IT CONSULTANCY & ADVISORY

Turning Technology Requirements into Practical Strategy

Excelogy Integrated helps organisations assess existing environments, identify technology gaps and develop practical strategies aligned with business priorities. Our consultancy considers integration, security, users, risk, maintainability and long-term value.

Strategy & Roadmaps

Technology strategy, modernisation planning and implementation roadmaps.

Architecture

Cloud, infrastructure, security and solution architecture.

Assessment

Infrastructure reviews, technology gaps and optimisation opportunities.

Governance

Risk considerations, implementation planning and technical documentation.

Advisory

Technology procurement, integration and delivery guidance.

MANAGED IT SERVICES

Technology That Keeps Working

Excelogy Integrated's Managed IT Services provide ongoing management and technical support across business technology environments, helping organisations reduce operational complexity while maintaining visibility and control.

Infrastructure Management

Administration, monitoring, maintenance and optimisation.

Cloud Management

Ongoing administration, configuration and optimisation.

Microsoft 365 Management

Operational support across productivity and collaboration environments.

Network Management

Monitoring, maintenance and troubleshooting.

Security Management

Operational security across identities, endpoints and systems.

Endpoint Management

Management and maintenance of business devices.

Backup & Recovery

Support for backup, restoration and recovery processes.

Patch & Updates

Structured management of operating system and application updates.

User Support

Technical assistance for users.

Preventative Maintenance

Identify issues and risks before significant disruption.

CYBER SECURITY

Security Built Into the Technology Environment

Excelogy Integrated takes a security-conscious approach to infrastructure, cloud services, identities, networks, endpoints, applications and business information. Security considerations form part of architecture, implementation and ongoing operations.

Assess

Security assessments and technical reviews.

Protect

Identity, endpoint, network and cloud security.

Control

MFA, access control and privilege management.

Monitor

Security monitoring and configuration management.

Resilience

Backup, recovery and security-conscious architecture.

CLOUD, MICROSOFT & NETWORK INFRASTRUCTURE

Modern Infrastructure for Modern Organisations

Excelogy Integrated helps organisations design, modernise and manage the infrastructure that underpins secure and productive operations.

Cloud & Infrastructure

Architecture, migration, deployment, backup, resilience and optimisation.

Microsoft Modern Workplace

Microsoft 365, identity, collaboration, administration and security configuration.

Network & Connectivity

LAN/WAN, wireless, secure connectivity, implementation, monitoring and troubleshooting.

SOFTWARE ENGINEERING

Build Technology Around the Business

Excelogy Integrated designs and develops software solutions, digital platforms and system integrations around defined business and operational requirements. Our engineering approach prioritises architecture, security, performance, maintainability and scalability.

Development

Web applications, business applications and digital platforms.

Integration

APIs, systems integration and workflow applications.

Data

Database-driven applications and data integration.

Technology Ecosystem

Python • JavaScript • TypeScript • Modern Web Technologies • APIs • Databases • Cloud Platforms

DATA & AI ANALYTICS

Build a Clear Path for Data & AI

Excelogy Integrated helps organisations organise, connect and use information more effectively through data integration, analytics, reporting, visualisation, automation and appropriate AI-enabled solutions.

COLLECT

Bring relevant information together.

INTEGRATE

Connect data across systems.

ANALYSE

Turn information into useful insight.

VISUALISE

Make performance easier to understand.

ACT

Support informed business decisions.

ENTERPRISE DOCUMENT MANAGEMENT

Governed Document Control, Built for Scale

Excelogy Integrated can deliver Enterprise Document Management platforms that centralise document capture, storage, retrieval, workflow and governance while integrating with existing databases and business systems.

Control

Centralised capture, role-based access, retention and governance.

Find

Intelligent search, tagging, metadata, indexing and barcode retrieval.

Automate

Templates, approvals, workflows, SLAs and real-time notifications.

Govern

Electronic signing, version control and complete audit logs.

Protect

Backup and restore, MFA and secure third-party API integration.

Integrate

Connect document workflows with existing business applications.

DIGITAL MARKETING

Technology-Enabled Digital Growth

Excelogy Integrated's Digital Marketing capability helps organisations strengthen their digital presence and make better use of online channels by combining strategy, technology, data and performance measurement.

Strategy

Digital strategy and online presence development.

Experience

Website and digital experience optimisation.

Visibility

Content strategy and search visibility.

Campaigns

Campaign support and marketing technology integration.

Performance

Digital analytics and performance measurement.

EXCELOGY INTEGRATED PROFESSIONAL TRAINING

Practical Digital Skills for Today's Economy

Excelogy Integrated extends its technology expertise into structured, practical training designed to help individuals, professionals, teams and organisations build relevant digital capability for modern work and business.

Our programmes focus on applied learning, practical projects and commercially relevant skills - helping learners move from understanding concepts to confidently using technology.

CYBER SECURITY

Build practical awareness and foundational capability across cyber security principles, digital risk, identity, access, endpoint and online security.

SOFTWARE DEVELOPMENT

Learn to build modern digital solutions - including pathways designed for beginners with no coding experience. Training progresses from core concepts to practical development, helping learners turn ideas into working applications.

AI AUTOMATIONS

Learn how to use AI and automation tools to streamline repetitive work, improve productivity, connect workflows and create practical business automations.

DIGITAL MARKETING

Develop practical capability in digital strategy, content, online visibility, campaign execution, analytics and performance-driven marketing.

DESIGNED FOR

Beginners • Working Professionals • Entrepreneurs • Business Teams • Organisations seeking workforce upskilling

THE EXCELOGY INTEGRATED LEARNING APPROACH

Learn → Practise → Build → Apply

Training should create usable capability, not simply course completion. Programmes are structured around practical application, guided exercises and skills that can be applied to real projects, roles and business challenges.

INDUSTRIES & ENGAGEMENT

Technology Across Business-Critical Environments

Financial Services

Secure, resilient and governed technology environments.

Healthcare

Information accessibility, security and operational continuity.

Government & Public Sector

Scalable technology and digital modernisation.

Education

Infrastructure, cloud, connectivity and digital capability development.

Professional Services

Secure, productive technology supporting collaboration.

Manufacturing

Infrastructure, connectivity, applications and data.

ENGAGEMENT MODELS

Technology Consultancy

Advice, assessments, strategy and architecture.

Project Delivery

Implementation, migration, engineering and modernisation.

Managed Services

Ongoing technology management, maintenance and support.

Professional Training

Practical programmes for individuals, teams and organisations.

WHY EXCELOGY INTEGRATED

Technology Designed for the Long Term

Technology should solve today's requirements without creating tomorrow's problems. Excelogy Integrated combines business-first thinking, technical delivery and practical capability development to help organisations build sustainable technology environments.

Business-First Thinking

Technology decisions begin with organisational requirements.

Security by Design

Security forms part of architecture, delivery and operations.

Consultancy + Delivery

Strategic thinking connects directly with implementation.

Managed Service Capability

Ongoing management and optimisation beyond project delivery.

Practical Skills Development

Training helps people and teams build usable digital capability.

Scalable Architecture

Solutions are designed for changing requirements and growth.

Documentation & Governance

Structured documentation supports long-term maintainability.

Continuous Improvement

Technology and skills evolve as business needs change.

LET'S BUILD WHAT'S NEXT

Talk to an Expert

Whether you are modernising technology, looking for a dependable Managed Service Provider, developing a digital platform or building practical digital skills across your workforce, Excelogy Integrated can help define a clear path forward.
